---

Photography  
Travel  
Literature  
Cinema  
Sneakers  
Fashion

## AWARDS

---

Charles B. Wang Asian /  
American Center  
-  
Wang Center Photography  
Architecture 2013

## PROJECTS

---

SweatrWeathr

This project is an iOS application that displays the weather for a given city and recommends clothing to wear. This application utilizes Open Weather Data API and Google Places API. *Swift*

- Weather data and temperature unit preference is saved with User Defaults
- Google Places is utilized for location search using CocoaPods
- Clothing recommendations are represented in a table view
- Hourly forecast and image are represented in a stack view within a collection view
- Users are seamlessly returned to their last viewed city upon relaunching the application
- Weather updates are limited to once every 10 minutes
- Background and weather image is dependent on forecast and time

Air Quality

This project is an iOS application that displays the air quality for a given city and briefly describes the quality of the air and what precautions to take. This application utilizes Air Visual API. *Swift*

- Air quality data is saved with User Defaults
- Background color and progress bar is dependent on air quality index

## EXPERIENCE

---

Tag

**Front End Engineer**

New York, NY  
Sept. 2017 to Nov. 2018

- Developed, maintained and updated over 100 online campaign materials in HTML, Javascript and JavaServer Pages to create dynamic, interactive, and modular experience for clients.
- Collaborated with UX/UI and content teams to meet business goals.
- Reduced development time of campaign materials by writing reusable code.

Droga5

**Finance Analyst**

New York, NY  
Feb. 2015 to Oct. 2016

- Achieved cash neutrality on jobs by creating weeking excel reports that monitor AR/AP to determine cash flow on average of \$2 million weekly.
- Collaborated with business affairs and account management teams to ensure seamless production schedules for 20+ clients.
- Recognized over \$10k in agency expenses that were not compliant with client agreements and contracts.
- Reduced expense claim cycle length with analysis of client contracts and scope of works by creating travel and expense claim directory.

## EDUCATION

---
